

JOHNSON WANG

Chemical Engineering Graduate | johnsonw1017@gmail.com | 0422 575 233

Career Objective

Personable, driven engineering graduate with experience in supply chain continuous improvement and operations. Effective team player in dynamic environments and proven ability in computer programming. Seeking to utilise these skills as a graduate engineer or data analyst.

Education

University of Queensland Master of Chemical Engineering

Feb 2017 - Nov 2021

- **Courses:** Engineering Process Design, Process Industry Data Science, Process Risk Management

Skills

- Proficient in Python, R, Tableau and Microsoft Suites
- Extensive knowledge in supply chain and logistics
- Project management and engineering design

Professional Experience

Mainfreight

Customer Champion – Logistics Team

Larapinta, QLD

Mar 2022 – Current

- Process up to 100 outgoing orders and incoming freight daily
- Work in close liaison with customer, warehouse operation and transport team to ensure delivery dates are met and correct documentation is given to the receiver
- Participated in business improvement project on increasing operational efficiency

Arnott's Biscuits

Causal Factory Worker - Operations Team

Virginia, QLD

Mar 2021 – Mar 2022

- Supported production needs by moving items between conveyors and staging areas
- Awarded "Team of the Month" in June and August of 2021

Placement Intern – Continuous Improvement Team

Jul 2020 – Dec 2020

- Quantified annual financial loss from flavour powder wastage in savoury cracker production
- Designed data collection method on biscuit size and weight variability in production line
- Critically assessed performance of oil and flavour sprinkler on flavour-to-biscuit adhesion

Extracurriculars

- Enrolled in Harvard's CS50 Computer Science Course
- Storyboard Artist for Animation Soup
